

The Memphis  Medical Society

Memphis Medical Society Offers BenefitEd

Your way to a better benefits package for your employees.

From student loan repayment to college savings, BenefitEd provides a full range of education benefits programs to help progressive employers create a more engaged and productive workforce.

Our Products

By supporting your employees' educational achievements and goals, you are rewarding the best and creating a competitive recruitment advantage. With BenefitEd, you have flexibility in choosing the right plan for your company. That includes Employee Choice, a patent-pending program exclusive to BenefitEd that gives your employees the option to use their matching dollars wherever those payments will benefit them most.

Employee Choice

Exclusively from BenefitEd, Employee Choice is a patent-pending program that gives your employees control over where your matching funds go—retirement savings, student loan repayment, or both—without adjusting your benefits budget.

Employer-Assisted Student Loan Repayment

Help employees pay down student loan debt with direct contributions or matching programs to reward loyalty, ease recruitment and reduce employee financial stress.

Employer-Assisted College Savings

Help your employees save for future education—their own or their family's—by supplementing 529 college savings contributions, encouraging financial planning, and helping them achieve their educational goals.

Payroll Deduction

If you're not ready to offer a matching program, you can still provide your employees with the ability to pay down their student loans or save for education through simple, convenient payroll deduction.
